

CREATING VALUE IN ARCHITECTURE

RCOMPROJECT

## COMPANY PROFILE

Arcomproject is a company with high standards of technical and cultural excellence. We provide integrated services thanks to our consultants specialised in the fields of architecture, structural and plant engineering.

Our organization culture has at its core a set of values and passions that we offer to share with our clients. The strategic objectives of Arcomproject include:

- to create and spread advanced culture in architecture
- to safeguard sustainability
- to spread functional and aesthetic added value
- to use new technologies correctly.
- Advancement of sophisticated architectural and interior design knowledge and culture;
- Promotion of sustainable, eco-friendly architecture;
- Spread of functional and esthetic quality;
- Implementation of the most up-to-date building techniques and technologies;
- Dissemination of Italian elegance, artistry and craftsmanship.

At the same time we assure full accountability, respect of all deadlines, streamlining of construction process, attention to cost containment.

## WHO

Arcomproject is an Italian architecture and design firm dedicated to the development of luxury international interior design and construction projects.

Our management and staff have a multidisciplinary background with advanced expertise in architecture, engineering, restoration, graphic design, luxury craftsmanship, art decor.

## WHAT

Our mission is to develop unique top-quality interior design, architecture and building management projects. We excel in taking on all contracting responsibilities in major architecture projects.

It is our pride to deliver to our international clients turnkey solutions providing the highest quality of Italian design, artistry and manufacturing.

Many years of experience in very competitive markets allow us to satisfy the most complex client needs in designing or renovating hospitality, commercial, office, residential and healthcare buildings.

Arcomproject has a significant multi-year track-record of major projects realized for prestigious Italian and international clients in areas such as architectural planning, building services, building restoration, interior design, furniture procurement, city planning, construction site supervision.

## WHY

Arcomproject mission is to challenge and overcome the obvious and the ordinary. Every project has to be unique and suited to the specific needs and desires of the individual client.

Our integrated multi-disciplinary approach is aimed to achieve tailor-made solutions so that clients are in full control of all phases of a project: from concept development to ultimate design, from construction site management to final building testing, from selection and purchase of furniture and accessories to their installation.

Arcomproject is an Italian architecture and design firm dedicated to develop spaces and locations unique in their complexity and capable to arouse intense visitors' emotion.

Our brand can satisfy all clients' needs and is able to deal with any project challenge through a customised working approach, perfectly suited to take on all levels of intervention, from urban scale to interior design.

Arcomproject develops projects from their initial concept phase to preliminary project, from master plan to final proposal and realization, guiding the customer and fulfilling completely all its desires and needs.

Our designing is inspired by beauty and top aesthetic quality, at the same time we are dedicated to innovation, functionality, choice of top materials and very accurate detail work. We are committed to respect bio-architecture and sustainability principles and engaged in implementing renewable energy sources.

Highest attention to details guides all of our work. We employ only highly skilled artisans that carry on the Italian tradition of workmanship excellence, and use the best design complements and most sophisticated finishing touches.

In our projects we always take into account functional requirements, space and shape complexity, richness of materials, project refinement, study of details and light.

Arcomproject focuses on design and final proposals for living and working spaces, teaching institutions, sport and healthcare facilities, always respectful of bonds between building and local tradition and location.

## WHERE

Our headquarters are in Rome, Italy and we are available to meet you anywhere in the world.

At present we have agents in several countries such as Argentina, Egypt, Myanmar (Burma), Sultanate of Oman.

## HOW

If you are interested in setting up a meeting please approach us using any of the following contacts and we will get back to you as soon as possible.
